Its indications are hawking, spitting, weak, inflamed eyes, frequent soreness of the throat, dry and heat of the nose, matter running from the head down the throat, often ringing or deafness in the ears, less of smell, memory impaired, dullness and dizziness of the head, often in its first stages, but more commonly in its advanced stages, attended with pains in chest or left-side, and under the shoulder blades. Indigestion usually attends Catarrh; backing cough and colds are very common. Some have all these symptoms-others only : part.
